

```
fmt::formatter< quantit  
::vquantity >
```

A diagram showing two boxes. The bottom box is shaded gray and contains the text 'fmt::formatter< quantit
::any_quantity_cref >'. A blue arrow points upwards from the bottom box to the top box. The top box is white and contains the text 'fmt::formatter< quantit
::vquantity >'. This represents an inheritance relationship where the bottom box inherits from the top box.

```
fmt::formatter< quantit  
::any_quantity_cref >
```
